The **EBONY** is a medium-frequency acoustic absorption panel. Its convex shape helps to reduce the first convergent angles in rooms. The front part of this model consists of a polyurethane resonant membrane in an air-box. Three other raw-materials with different properties are used inside it.

In spite of its small size, the **EBONY** also has a reasonable absorption coefficient at low frequencies. Due to its shape, the absorption panel **EBONY** combines to perfection, technically and aesthetically, with the ATP diffuser model, the **IVORY**.

This product is meant to be mounted on walls and ceilings and its low weight makes it particularly suitable for ceilings. The **EBONY** is an absorbent panel which is widely efficient in the mid and mid-low range of the sound spectrum.

**FEATURES**

- Uses 55% of recycled materials.
- NRC: 0.64/m².
- 100% recyclable.
- Fire-resistance: Euroclass B (similar to old M1).
- Installation: accessories included.

**IMPORTANT NOTICES**

- **JOCART** accepts no responsibility for any printing errors. Specifications can be modified without prior notice, if technical or commercial reasons so require.
- **RAL** is an internationally independent colour standard system partner for industry, trade, architecture and design. Should be consulted before placing any order.
- **NRC** values are only a reference and an indication of the products’ properties. The colours shown are only a reference and an indication of the products’ finishing. The colours shown are not binding because brightness, contrast and colour balance may vary due to the printing process.
- **RCL** values are only a reference and an indication of the products’ finishing. The colours shown are not binding because brightness, contrast and colour balance may vary due to the printing process.
- Important: Wood and Fabric products are highly susceptible to change its appearance with humidity and temperature. Close attention must be paid to the storage conditions and the acclimatization before, during and after the installation.
- Important: Important Comfort Standards state a temperature range of 20°C - 27°C (68°F - 81°F) and a relative humidity of less than 60%. These would be considered as normal operational levels of **JOCART** products range.
- Despite all the standard sizes of all products, this model can be customised upon previous consultation. Sizes may vary slightly due to their production method and some inherent raw-materials characteristics.
